Protect yourself from Scams

Protect your Purchases and Sales from Fraud and Dishonesty

The Internet just like every other part of life these days has a Bad element called (Scams).

Luckily there are a few steps we can take to minimize our chances of been taken for a ride.

So we have put together a guide to let you quickly identify the latest scams and other types of fraud, as well as guide to safely take you through the Buying and Selling process.

Buyer Safety

Seller Safety

Payment Scams

Phishing Scams

5 Golden rules of the Internet

1. Have up to date antivirus software.
2. Have up to date firewall software.
3. Choose a secure password.
4. Always log off when done.
5. Most importantly...

If the offer looks too good to be true, then it probably is!!

Know what to look for

Unfortunately Scammers don't all look the same, So you got to know what to look for to identify the risk.

Payment Scams

Payment scams involve false sellers trying to trick buyers into sending payment for goods that don't exist.

Double check everything before you pay

Phishing Scams

Phishing Scams are created by fraudsters to have you believe they have been sent from a legitimate organisation like your bank etc.

Don't go fishing with these scammers

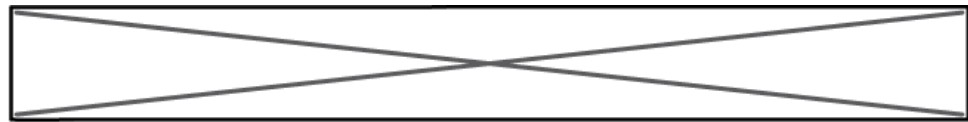

False Enquiry

False enquiry scans these bad guys will con sellers to pay unusual fees or refunds

Don't get ripped off
